

PROMETEUS

PROJECT OBJECTIVES

Electro-mobility has been identified as a priority within EU policies being a sustainable, low-carbon alternative for transport; however, poor availability of dedicated infrastructures and low user awareness are considered as major barriers to be addressed.

PROMETEUS aims at overcoming such barriers and promoting e-mobility through the improvement of five Structural Funds Programmes:

- OP ERDF / Cohesion Fund of Malta 2014-2020
- ROP ERDF Carinzia Region 2014-2020
- ROP ERDF Castilla y Leon Region 2014-2020
- ROP ERDF Lazio Region 2014-2020
- ROP ERDF Presov Region 2014-2020

In particular, in the framework of the ROP ERDF 2014-2020, Lazio Region aims at enhancing the following Actions:

- **Action 4.6.1** "Creation of infrastructures and interchange nodes aimed at increasing collective mobility and the eco-compatible distribution of goods and related transport systems"
- **Action 4.6.2** "Urban sustainable mobility interventions also encouraging the use of transport systems with low environmental impact, the completion, the equipment of the system and the renewal of fleets"
- **Action 4.6.3** "Intelligent transport systems"

The improvement and development of these Actions will be achieved through:

- An in-depth analysis of the state of the art of e-Mobility in the Rome metropolitan area;
- The definition of guidelines aimed at fully integrating the issues of e-Mobility and multimodal transport in the design and implementation of infrastructures and services in transport nodes (eg charging points in specific areas of the Park & Ride of railway stations) ;
- The establishment of detailed criteria to meet the conditions for green public procurement;
- The development of IT solutions for the management of areas with limited traffic, in order to favor access priority mechanisms for electric vehicles;
- Improving the governance and coordination between the various bodies, plans and instruments for planning sustainable mobility in the metropolitan area.

PARTNERS

- Transport Malta – Lead partner (MT)
- Regional Government of Carinthia (AT)
- General Directorate of Industry and Competitiveness Regional Government of Castilla y León (ES)
- Regione Lazio (IT)
- Prešov SelfGoverning Region (SK)
- Poliedra – Politecnico di Milano (IT)

BUDGET

The total budget amounts to 1.419.165,00 Euros; the budget of Lazio Region amounts to 232.200,85 Euros.

PROJECT DURATION

Phase 1: 01/01/2017-30/06/2019 - **Phase 2:** 01/07/2019-30/06/2021

PROJECT PHASES

PHASE 1

- Context analysis of the electromobility sector
- Identification of Good Practices
- Selection of Good Practices to be included in the mainstreaming regional programming
- Elaboration of the Regional Action Plans
- Processing of the LogBook, a tool for monitoring the level of implementation of the Regional Action Plans
- Organization of the Intermediate Conference

PHASE 2

- Implementation of the Regional Action Plans
- Monitoring, evaluation and dissemination activities
- Organization of the Final Event

INTERREGIONAL LEARNING PROCESS

Prometeus adopts a shared planning approach at interregional level based on the following activities (a strong involvement of local stakeholders is expected):

- **Interregional Workshops (IW):** six-monthly meetings during which partners and stakeholders analyze the results of the project
- **Interregional Field Visits (FV):** six-monthly meetings during which the partners present their Good Practices in the field of electro-mobility
- **Focused Meetings (FM):** bilateral meetings between two partners in order to deepen the analysis of high added value good practices
- **Regional Codesign Stakeholder Workshops (RCSW):** six-monthly meetings organized by partners to transfer good practices and lessons learned during transnational meetings to local stakeholders.
