

ITALMED (2009-2011)

The theme of the Project was the facilitation of the relationship between countries of the southern Mediterranean coast through both material and immaterial infrastructural interconnections, for the integration of the markets. The Regional Directorate for Transport of Regione Lazio joined the Line 2.2 - *Material and immaterial interconnections* and in particular the activities of the sub-projects 4 (EGIPT), 5 (MOROCCO) and 6 (TUNISIA).

The Project interventions were particularly focused on studies, training, information and experience exchanges, transfer of organizational/management models, pilot projects, workshops and commercial missions.

In the project, each Region appointed a developer of the activities and the Directorate for Transport appointed AREMOL. RUP Region - Regione Campania.

The total budget for the Project was € 3,347,342.94 (€ 2,865,000.15 FAS + € 482,342.79 COF.) whereof € 50,000.00 of match funding from the Regional Directorate for Transport and € 98,616.02 of FAS funds assigned to the Regional Directorate for Transport. Because of the withdrawal of Regione Calabria and Regione Liguria, upon acceptance by Regione Lazio, a new reallocation of the resources was carried out, resulting in a reorganization of the budget of € 57,000.00 FAS funds and € 8,550.00 funds guaranteed by AREMOL.
